

Cover Letter Sent To Israel

Dear Friends,

Over the years it has become fashionable for many organizations which call themselves “Christian” to, at the very least, discuss disinvestment from the nation of Israel, or to take other actions designed to harm the nation of Israel in some form. It is our opinion that any organization which can even bring such a thing before their members or boards must be far-off track from where any Bible believing organization should be. However, since such organizations have taken this stance, we feel it is our duty and privilege to fight against this evil by making it amply clear, we disagree with others’ attempts to villainize The State of Israel!

I am writing today in order to share with you our most recent official document, showing our support for Israel and the Jewish people. We pray it is only one of many letters and documents of support received by your office, which encourage you to continue fighting for the rights of the Jewish people and your historic nation. As a U.S. based organization, we are also sending this document to the U.S. State Department. We stand with you, and want you to know that we may not be a large organization, but we will continue to take whatever opportunity is available to us to support Israel, and encourage others to do the same!

Thank you for your time, and may God bless all those who truly seek to do His will!

Sincerely,  
Philip E. Busby  
Director  
Living Springs Institute

*The Members Of Living Springs*

*2010*

The members of Living Springs recognize the historic connection between the Jewish people and the land of Israel. We call upon the world to acknowledge the Jewish right to a homeland and nation on the land of their ancestry, with an undivided Jerusalem as its capital.

The world must recognize the right of the Israeli people to continue with their lives in a normal way, and cease to pressure the Israeli government to freeze the building of homes and infrastructure on land currently under its administration.

It should be further recognized that the practice of pressuring the Israeli government to concede land for the prospect of peace has only furthered the instability of the region and cost the lives of many people, both Jewish and non-Jewish.
